See the Difference

In The Value of a ComfortSeries™ Walk-in Tub

Functional & Stylish, anyone can use the bathroom

Institutional, limits accessibility to others who want to use bathroom

Handshower is hard to reach

Fully accessible, Barrier-free slide-in & out tub

Not barrier-free, water overspray will pool on floor, must step over tub

Faucet, drain, safety bars & controls are easy to reach

Trip Hazard from edge, no soaking available, bather must stand or use chair

Full access to tub seat, with soaking and 44 therapeutic jets

Even in tight spaces, the door opens wide over a right height toilet

Seat is on opposite side of shower, glass doors are barriers

Still a forward/sideways fall hazard, faucets can be hard to reach

Bather is fully contained; faucet, handshower & tub controls all are within reach

QuickDrain® Fast Water Removal System drains all water 8 times faster, and in less than 2 min.

Regular drain may cause bather to cool too quickly, causing discomfort

Imagine the Difference in Your Bathroom
