

Walk-in Bathtubs should be flushed on a **monthly basis** when product is under normal use. Below are the recommended procedures for cleaning.

Cleaning the Jet System:

1. **Do not run the jet massage system dry.** Fill the tub with hot water 2-3 inches above the jets and add 2-3 teaspoons of low foaming dishwashing machine detergent such as Cascade.
2. Turn on jet massage system and run for 10 minutes.
3. Drain tub completely.
4. Fill tub with cold water above jets.
5. Turn on jet massage system and run for 15 minutes.
6. Drain tub completely.

Cleaning the Suction Cover:

1. Clean and remove any hair or lint from the suction cover.
2. On a monthly basis, unscrew the suction cover and clean away any hair, lint or debris from the cover and housing, then remount the cover in place.
3. Some suction covers are not designed to be removed; only suction covers that have screws on the cover, visible from the inside of the tub, can be removed.
4. **Never operate the unit with the safety cover off.**

Regular Wipe Downs:

1. **Do not use abrasive cleaners or cloths**, as they will scratch and dull the surface.
2. Wipe with a damp cloth only
